Download this pack with height map and many textures, sounds and models. mbp Jul 8, 2019 Download this pack with heights map and many textures, sounds and models. Vegetation . These other texture packs do not use any JTV models and are only textures. Clay . These other texture packs use JTV models and are optimized. Models/Sounds . These other texture packs use JTV models and are optimized. Map Mods . The maps in this category use an "airplane" style format (airplanes) or a "footer" style (footers) that are now

"dynamic" meaning that all of the items in the map will change depending on what you hold on your inventory. Also all of the basic spawns have their own specific spawn point depending on what you hold on your inventory.

Ore Chunks . These mods are sets of ore chunks that are crafted to look like "real-life" ore. The end result of the block will change depending on what you hold in your inventory. For example, you may see an iron block that looks like a block of iron, but when you mine it, it will turn into a piece of iron that looks like a block of iron.

3D Models . These mods are models made for Minecraft. The models change shape and appearance based on what is in your inventory. For example, if you hold a carrot, the model of the carrot will change shape to look like a carrot. To add mods to

the lists above, please make a wiki post on the Official Minecraft wiki here. Vanilla Airplane Vanilla Airplane is a model of an airplane that is now able to be constructed in Minecraft using the jetpack. However, the structure of the aircraft will change based on what you hold in your inventory. For example, if you hold a carrot, the shape of the craft will change to look like a carrot. This is done by the mod author, Realism-Extreme. JTV Bones JTV Bones is a model of bones. As you use the bones, the model of the bones will change to look like the bone in your hand. This is done by the mod author, JTV Bones. JTV Mannequin JTV Mannequin is a model of a human. As you use the model,
