ThinkVantage Secure Data Disposal Crack+ License Keygen [Latest 2022]

I have updated the "ThinkVantage Secure Data Disposal for DOS" application to provide a Windows version. This version will allow you to securely remove all of your data from your hard drive. The source code for the Windows version was given to me by Mike Hutzelman. This version is the same as the "ThinkVantage Secure Data Disposal for DOS" application with the following major differences: 1. This version will work on NT and 2000. 2. It will ask you for a password if you try to access the drive while it is not set to Read/Write protected. 3. If you happen to have a CD in the drive, you will not be asked for a password if you are already doing a secure wipe. 4. If you try to access the drive while it is Read/Write protected, the program will tell you that it is not allowed and ask you if you really want to use the drive. If you have any problems, please let me know! All comments and suggestions welcome! hiloye@thinkvantage.com ThinkVantage Secure Data Disposal for Windows Feel free to drop me an email if you have any comments or questions.
