PLEASE FEEL FREE TO REVIEW OUR APP Tapatalk, is the online discussion platform of Android, and a one that I have been using on my mobile phone for a while. Tapatalk has been a great app for me and it has been part of my Android experience since its release, because I love discussing different topics in groups and I have found this app to be very powerful, on mobile devices. The app allows you to read and send your posts, and it has a comment feature that is super easy to use. Nevertheless, there are times when I get frustrated with the app, specially when it comes to the group notifications because they are just not as clear as the ones I got on Facebook for example. That is where the Tapatalk APK/Cydia tweak comes in handy. A great tweak for tappers I've been using this tweak for a while now, and I can say that it's one of my favorites for the iOS platform. This tweak gives you the same notifications you already have with the standard Tapatalk interface. In fact, you get the same notifications on your iOS device, plus all the visual changes the tweak brings, but it gets rid of some unnecessary options, like the possibility of turning off the online chat on Android. The tweak is really simple to install and configure, and you will see almost no visual changes in the app. To install and configure the tweak, you can just simply add the tweak's APK to Cydia, and this is it. But, if you still prefer to install this tweak manually, the tweak is really easy to install. It is not a jailbreak tweak, and it will not affect your device in any way. One of the best tweaks for Tapatalk, is that it does not require you to have the Tapatalk app installed on your device. To be clear, Tapatalk is the app you use to log into the official Tapatalk website, but it does not have to be installed. 1d6a3396d6
